

Los Angeles County COVID-19 Community Testing Dashboard

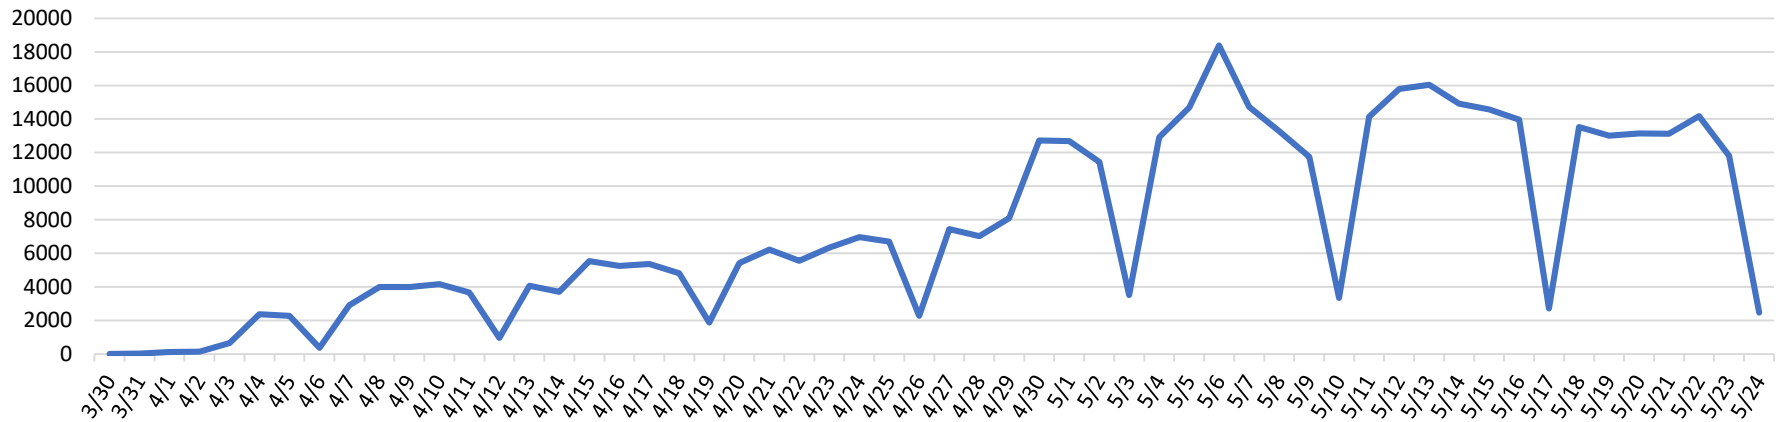

***Last Updated:
May 26, 2020***

This dashboard summarizes COVID-19 Diagnostic Testing using the Polymerase Chain Reaction (PCR) Molecular test for SARS-CoV-2 at Community Testing Sites in Los Angeles County. This dashboard will be updated weekly. Data presented on testing completed at County- and City-operated Community Testing Sites only reflects a portion of the testing happening across LA County. Additional information on Countywide COVID-19 testing can be found on the [Los Angeles County Department of Public Health Dashboard](#), [Long Beach Public Health Dashboard](#), and the [Pasadena Public Health Dashboard](#).

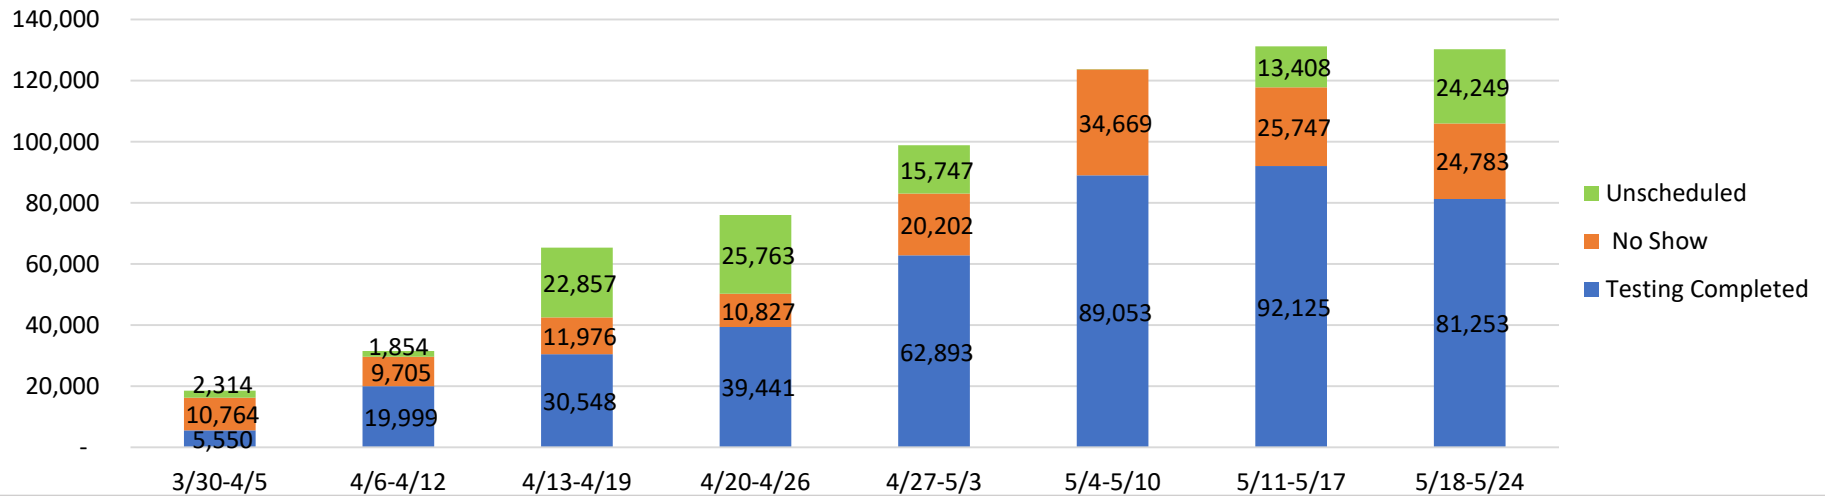

Community (PCR) Testing Volume/Utilization¹

Number of COVID-19 Tests Completed Daily at LA County Community Testing Sites

Utilization of Available COVID-19 Testing Capacity

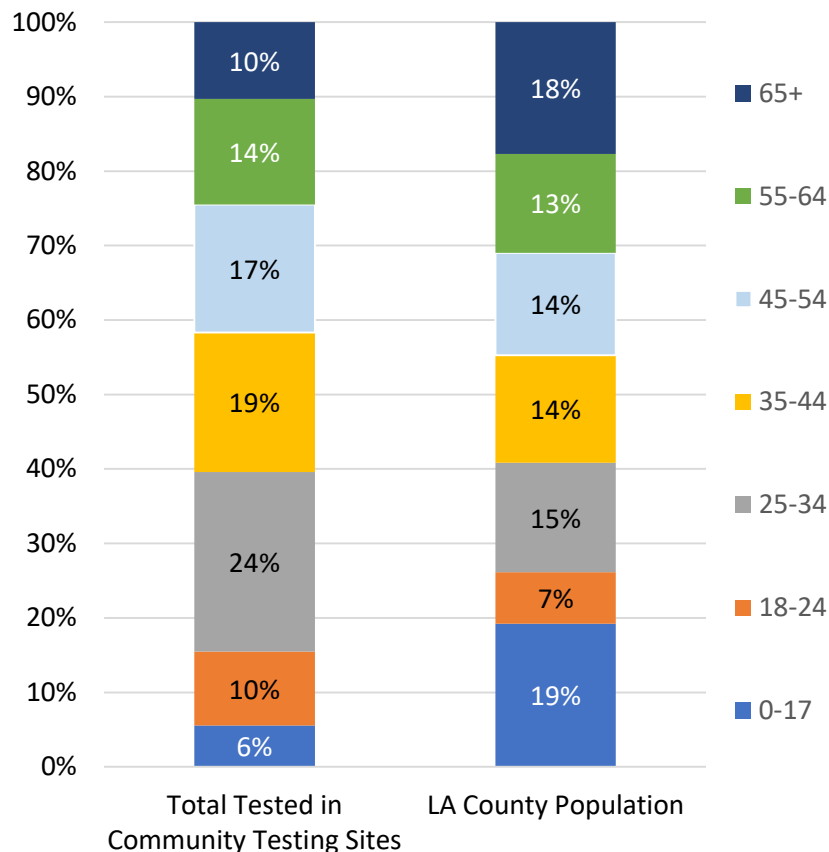

1. Testing at LA County community COVID testing sites since March 30, 2020. Community testing sites include: City and County-operated testing sites. Does not include tests completed at State testing sites. Tests completed represents testing that have a state of "Closed Complete" on the corresponding test date.

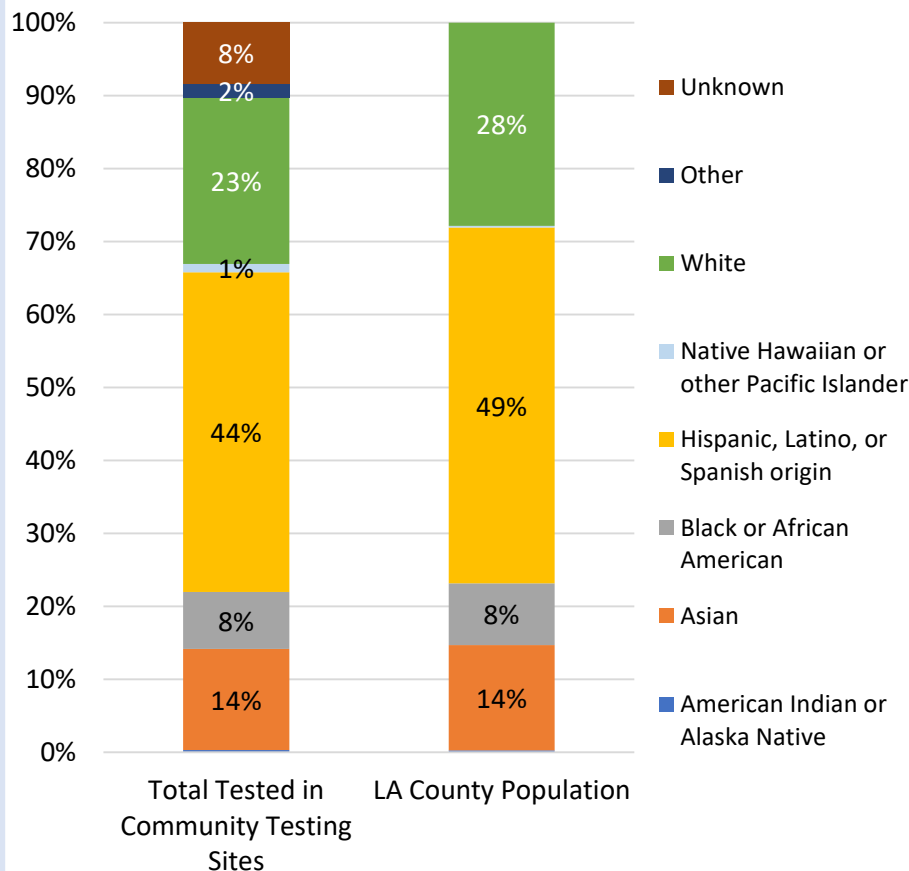

Community (PCR) Testing Demographics¹

(LA County N = 10,278,834; Total Tests Completed at Community Testing Sites N = 420,830)

Total COVID-19 Tests Completed by Age Group

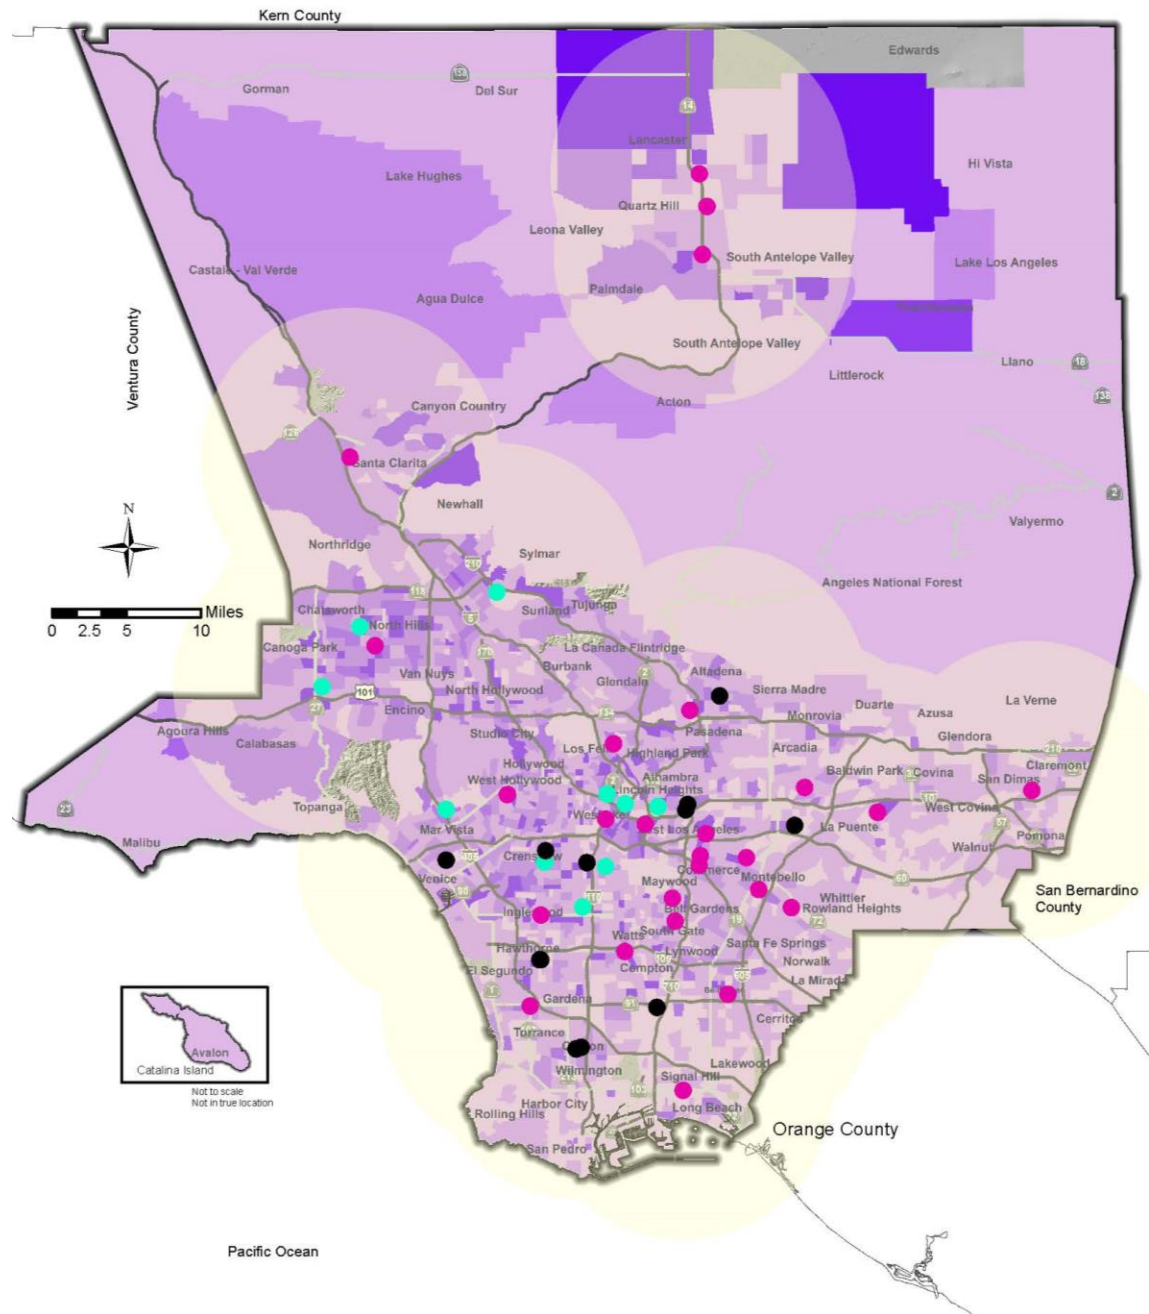

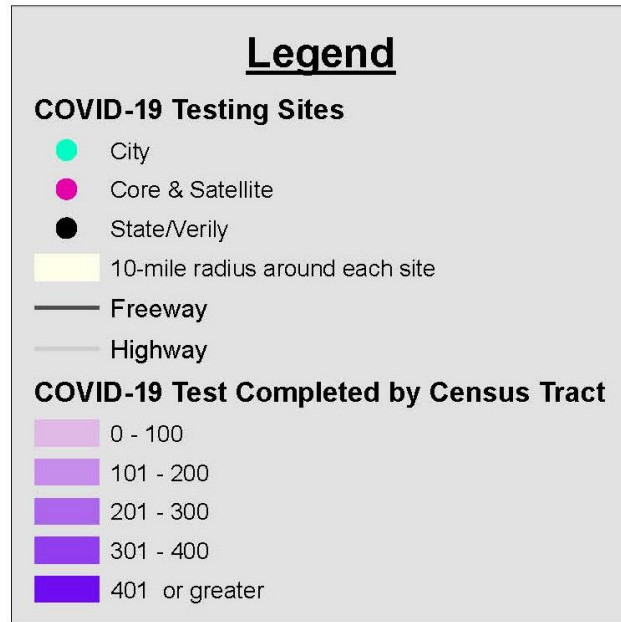

Total COVID-19 Tests Completed by Race/Ethnicity

1. Tests completed at LA County community COVID testing sites between March 30, 2020 – May 24, 2020. Does not include tests completed at State testing sites. Sexual Orientation and Gender Identity (SOGI) data will be added soon.

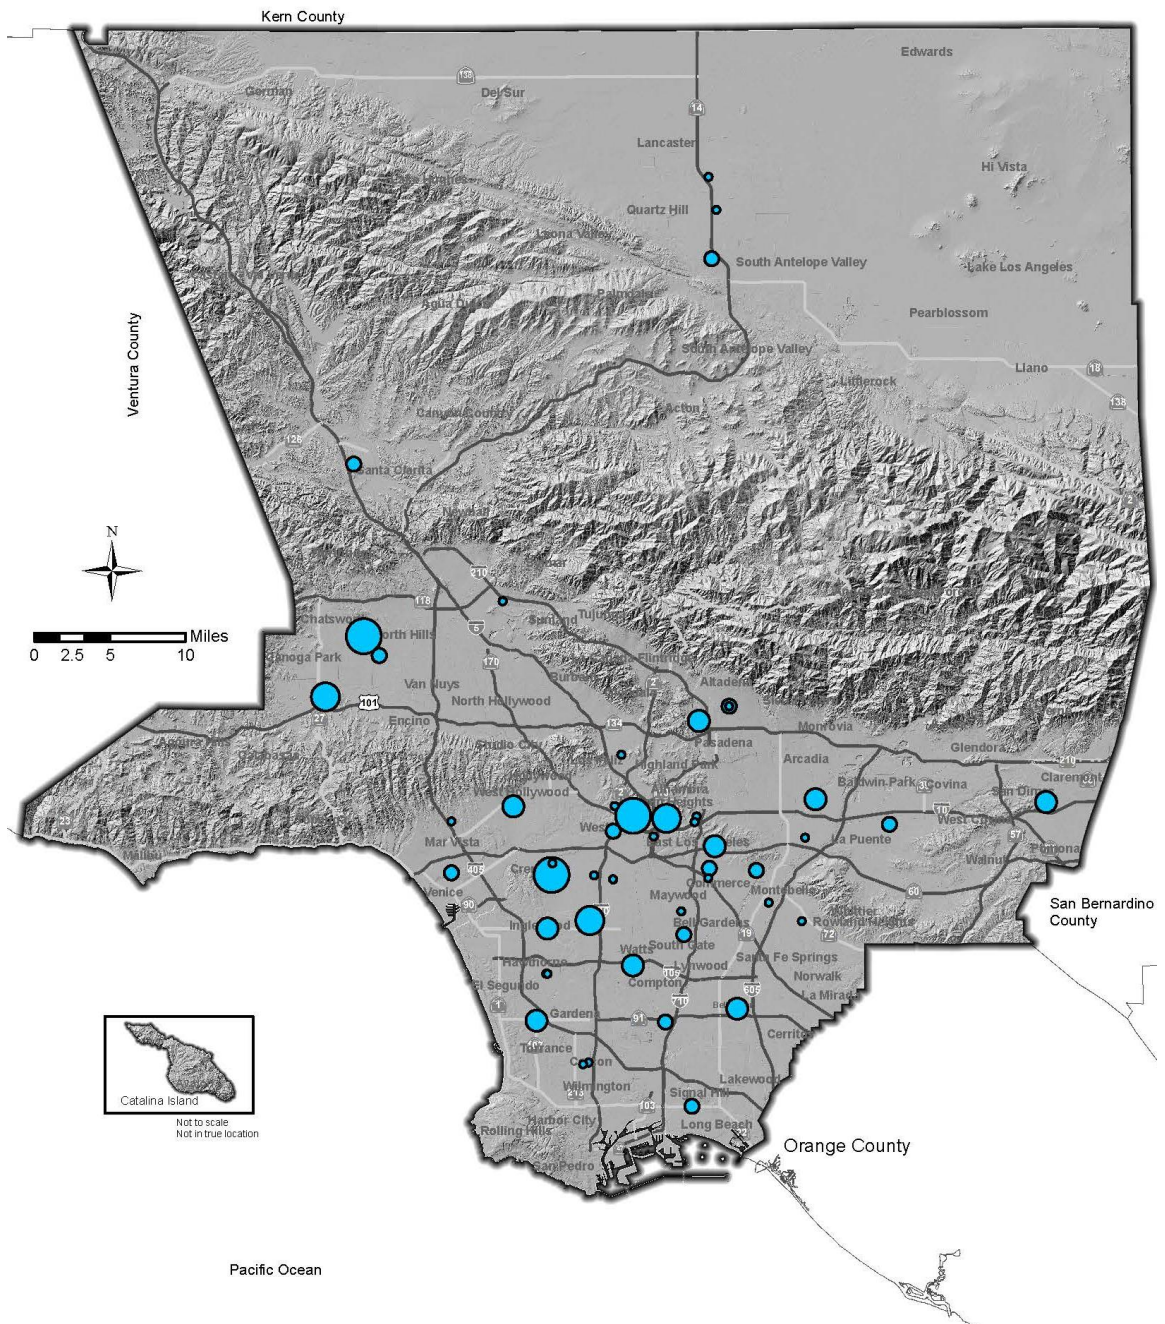

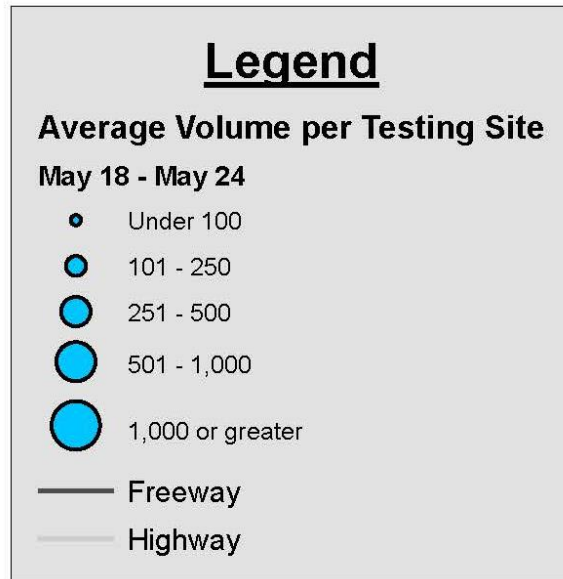

Community (PCR) Testing by Census Tract, Cumulative¹

1. Testing to date at LA County community COVID testing sites since March 30, 2020. 10-mile radius is used as a proxy for the State's expectation that at least 75% of a region's population has a testing site within 30 minutes drive in urban areas and 60 minutes drive in rural areas.
